

Ref 680 – Infusion Complex

Infusion Complex is a combination of special knitted mesh that is used for resin distribution in resin infusion, laminated to a perforated release film. It comes with green tracer threads that indicate the roll direction of the mesh. Safe time with this ideal solution and optimize the infusion process.

Features

Excellent resin flow
Adaptable for different shapes, corners and contours
Does not leave unsightly indentations
Use up to 100°C (Melt point onset is 125°C)
Can be used with all resins

Suggested Uses

Resin infusion
CRIMP
VARTM

Details

Composition: 100% HDPE Monofilament yarn
Composition film: 100% HDPE
Configuration of net: KNITTED
Colour: Yellow with green tracer thread.
1,1mm (nominal thickness)
Film perforation : P31 : \varnothing 0,5 / pas 6,35mm
Resin waste: 587 g/m²
Mesh weight of 160 g/m² (+/- 8%)
Available width: 1,45 m
Available length: 100 m
